

SHASHANK S. PABITWAR

DATA ANALYST

Flemington, NJ | (480) 876-3633 | spabitwa@asu.edu
[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Tableau Public](#)

EXPERIENCE

[OrgPath](#) | Data Analyst

Aug 2025 - May 2026

- Automated **25 recurring reports** for HR and leadership teams, reducing manual reporting time by **60%**.
- Built Tableau dashboards for **2,000+ employee profiles** to track retention risk and succession readiness.
- Integrated HR, performance and assessment data into PostgreSQL using Python and SQL; added automated validation checks.

PROJECTS

When America Runs Late

[Tableau](#) | [GitHub](#)

Analyzed **24.42M U.S. flights** using Python, SQL and Excel; built a Tableau dashboard comparing delays by departure time, airline and airport.

PrepInterview AI Product Analytics

[Tableau](#) | [GitHub](#) | [Live product](#)

Built SQL/Tableau dashboards from **125,044 synthetic events for 8,000 modeled users** to analyze user drop-off, feature adoption and retention.

NYC Taxi Operations - January 2025

[GitHub](#)

Built a **Power BI report covering 3.48M taxi records** using Power Query and DAX to analyze trip patterns, passenger spending and data quality.

PixelPlanes Multiplayer Game

[Live game](#)

Built and deployed a JavaScript flight game supporting **six-player rooms**, WebSocket multiplayer, real-time voice chat and adaptive AI opponents.

New York, In Motion

[Tableau](#) | [GitHub](#)

Used Python and Tableau to analyze **1.299B subway entries across 424 station complexes**, comparing busy stations, peak travel hours and ridership trends.

Email Campaign Analysis

[Live report](#) | [GitHub](#)

Analyzed a **64,000-customer email experiment** using SQL/Python and statistical testing to estimate extra purchases and model campaign returns in Excel.

CFPB Complaint Operations Analytics

[Tableau](#) | [GitHub](#)

Modeled **9.36M financial complaints** in Snowflake/dbt and built Tableau dashboards tracking complaint growth, recurring issues and timely company responses.

When Lights Went Out

[Tableau](#) | [GitHub](#)

Processed **236 NASA satellite files** using Python and Tableau to compare nighttime brightness after Hurricane Ida across three Louisiana parishes.

EDUCATION

Arizona State University | Tempe, AZ

May 2026

B.S. Computer Science; Minor in Data Science | **GPA: 3.89/4.00** | Summa Cum Laude

Global Career Accelerator | Web Development & AI | Aug - Dec 2025

Completed the program and earned four verified credentials. [Credential wallet](#)

TECHNICAL SKILLS

Analysis and reporting: SQL, Python (pandas, NumPy), Excel, Tableau, Power BI, DAX, Power Query

Data and modeling: Snowflake, dbt, PostgreSQL, DuckDB, ETL, data validation, Git/GitHub
