

SHASHANK S. PABITWAR

REACT | TYPESCRIPT | NODE.JS | PYTHON | POSTGRESQL | AWS
Flemington, NJ | (480) 876-3633 | spabitwa@asu.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer and ASU Computer Science graduate with a minor in Data Science, building React/Next.js, TypeScript, Python and Node.js applications plus validated SQL/Python workflows and Power BI/Tableau dashboards.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML5, CSS3

Frontend: React, Next.js, Vite, Tailwind CSS, React Router, responsive design, accessibility

Backend & Data: Node.js, Express.js, FastAPI, REST APIs, GraphQL, WebSockets, JWT/OAuth, PostgreSQL, Snowflake, dbt, DuckDB, SQLAlchemy, ETL/ELT

Analytics & BI: Python (pandas, NumPy), SQL (joins, CTEs, window functions), Power BI, Power Query, DAX, Tableau, Excel (PivotTables, XLOOKUP, SUMIFS), statistical analysis, data cleaning, validation, dimensional modeling

Cloud, DevOps & Testing: AWS (EC2, S3, RDS, Lambda), Redis, MongoDB, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Jest, React Testing Library, Playwright, pytest, Git/GitHub

EDUCATION

ArizonaState University, Ira A. Fulton Schools of Engineering | Tempe, AZ | May 2026

B.S. Computer Science; Minor in Data Science | GPA: 3.89/4.00 | Summa Cum Laude

PROFESSIONAL EXPERIENCE

OrgPath | *Full-StackDeveloper* | Aug 2024 - May 2026

- Built 11 role-based React/TypeScript workforce dashboards and Tableau executive views for 2,000+ employee profiles, using SQL/Python pipelines and KPI models to surface succession readiness, retention risk, organizational health, and leadership-pipeline performance.
- Developed Node.js/Express REST APIs and Python/SQL ETL workflows integrating HR, performance, and succession-planning data into PostgreSQL; added JWT authorization, validation, search/filter services, and automated data-quality and integration checks.
- Automated 25 recurring reports with HR, product, engineering, and executive stakeholders, reducing manual reporting time by 60%; containerized the application and added GitHub Actions CI/CD for tested releases.

Global Career | *Web Development & AI Program* | Aug 2025 - Dec 2025

- Developed responsive websites, games, and AI-powered applications using JavaScript, DOM manipulation, OpenAI/Mistral APIs, and local storage; applied accessibility, localization, prototyping, and AI-assisted debugging, earning four verified program credentials.

PROJECTS

PrepInterview AI | *Next.js, TypeScript, FastAPI, PostgreSQL* | [GitHub](#) | [Tableau Dashboard](#) | [Live Product](#)

- Built an AI interview-preparation platform where users practice role-specific questions, complete mock interviews, and track performance, with 37 REST/GraphQL endpoints, 14 SQLAlchemy models, JWT/email OTP, PostgreSQL/Redis and OpenAI/Tavily workflows; delivered a Next.js/TypeScript frontend, containerized services, AWS/Terraform deployment, CI/CD, and pytest/Jest/Playwright coverage.

PixelPlanes Multiplayer Game | *React, TypeScript, Node.js, WebSockets, Redis, Kubernetes* | [GitHub](#) | [Live](#)

- Built a six-player server-authoritative browser game for room-based multiplayer, real-time voice chat, and AI opponents, with 60 Hz simulation, client prediction/interpolation, LiveKit voice, WebSockets, PostgreSQL/Redis, Docker/Kubernetes, automated tests, reconnect recovery, and multi-region load testing.

PropertyLens | *Next.js, TypeScript, Express.js, GraphQL, PostgreSQL, AWS*

- Built a full-stack property-intelligence platform that helps users evaluate properties and location risks; added authenticated saved searches, PostgreSQL persistence, REST/GraphQL services, live listings, Leaflet/GeoJSON risk layers, automated tests, Docker packaging, and AWS deployment.

CFPB Complaint Operations Analytics | *Tableau, Snowflake, dbt, SQL* | [GitHub](#) | [Dashboard](#)

- Modeled 9.36M complaints through 15 dbt/Snowflake models, passed 31 tests and six reconciliations with zero duplicate IDs, and published a Tableau dashboard surfacing complaint growth and 80.9% credit-reporting concentration.

NYC Taxi January 2025 Analytics | *Power BI, Power Query, DAX* | [GitHub](#)

- Built a three-page Power BI star-schema report for 3.48M taxi trips using Power Query and DAX; reconciled 3.25M valid and 224K excluded rows (93.55% validity) and surfaced approximately \$88M in gross passenger spend.

CERTIFICATIONS

AWS Certified Developer - Associate | **GitHub Actions Certification**

Certified Kubernetes Application Developer (CKAD) | **Salesforce Certified Tableau Desktop Foundations**
